

IT Manager, Financial Systems/ERP

Confidential Washington, DC

Job Description

We are looking for the best and brightest to join our Team! We provide a comprehensive program that supports and enhances the quality of life for our organization and the people it serves. We offer challenging work in a team oriented environment that offers real work-life balance, great benefits and more. Our team helps keep the organization functioning smoothly and effectively. As a service-oriented organization, we never waver in our commitment to our mission.

Job Requirements

Overall, the Supervisor is responsible for the following:

- Lead all aspects of domain technology, including assessment of current processes, strategy, planning, providing recommendations, program and process management, and delivery of innovative, highly reliable and robust business solutions.
- Effective and efficient program and project management of applications consistent with the Organization and IT Department's strategy, to support and drive the overall growth objectives of the business.
- Work with functional business heads and other key stakeholders to ensure that correct resources are applied so that all projects are delivered accurately and in a timely fashion.
- Significant experience with Microsoft Project Professional.
- Drive efficiency at all levels; ensure that deliverables are on time and on budget.
- Create an environment where employees understand the business direction and goals, focus on key priorities, act with urgency and take intelligent risks in consultation with team, project and Department management.

Qualifications

- Five years of progressive supervisory/ managerial experience leading an ERP Financial System group, support, development and implementation.
- Demonstrated experience leading the support and implementation of Financial Systems.
- Strong technical and functional knowledge of industry leading packages.
- Prior involvement in ERP (FI) selection process, preferably in a lead role.
- Must possess a working understanding of UNIX, Windows operating systems and web tiered architecture and application server middle tier software.
- Strong functional knowledge of Accounting and Finance terms and processes.
- Strong Program and Project Management experience. Must demonstrate experience leading large, complex software development and implementation projects, while also managing a portfolio of other initiatives.
- Strong knowledge of financial functions (GL, AR, AP and Asset Management at a minimum) and the ability to communicate easily with functional users at all levels.
