

Manager, IT PeopleSoft - Human Capital Systems

Confidential Washington, DC

Job Description

We are looking for the best and brightest to join our Team! We provide comprehensive programming and support that enhances the quality of life for our organization and the people it serves. We offer challenging work in a team oriented environment that delivers real work-life balance, great benefits and more. We keep the organization functioning smoothly and effectively. As a service-oriented organization, we never waver in our commitment to our mission.

Job Requirements

- Lead all aspects of domain technology, including assessment of current processes, strategy, planning, providing recommendations, program and process management, and delivery of innovative, highly reliable and robust business solutions.
- Effective and efficient program and project management of applications consistent with the Organization and IT Department's strategy, to support and drive the overall growth objectives of the business.
- Work with functional business heads and other key stakeholders to ensure that correct resources are applied so that all projects are delivered accurately and in a timely fashion.
- Significant experience with Microsoft Project Professional.
- Drive efficiency at all levels; ensure that deliverables are on time and on budget.
- Create an environment where employees understand the business direction and goals, focus on key priorities, act with urgency and take intelligent risks in consultation with team, project and department management.

In addition, the manager, Human Capital Systems, must possess the following:

- Five years of progressive supervisory/ managerial experience leading a PeopleSoft Development team supporting, production, enhancements, bundles, updates, upgrades and implementations.
- Demonstrated experience leading the technical support and technical implementation of PeopleSoft HCM.
- Strong technical knowledge of PeopleTools 8.5X and above, PeopleCode, SQR and SQL.
- Strong functional knowledge of PeopleSoft 9.X and above.
- Must possess a working understanding of UNIX, Windows operating systems and web tiered architecture and Weblogic.
- Strong Program and Project Management experience. Must demonstrate experience leading large, complex software development and implementation projects, while also managing a portfolio of other initiatives.
- Strong knowledge of Human Resource and Payroll functions and the ability to communicate easily with functional users at all levels.
